

This following document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of this fund. You are advised to read it so you can make an informed decision about whether to invest.

SKAGEN Vekst A - equity fund [EUR]

ISIN: NO0008000445

This Fund is managed by SKAGEN AS (org. no. 867 462 732).

Objectives and Investment Policy

Objective

The fund's objective is to provide unit holders with the best possible risk adjusted return, through an actively managed portfolio of Nordic and global equities.

Investment strategy

SKAGEN Vekst has a global investment mandate, but should invest at least 50 percent of its assets in companies listed or traded on the Nordic stock market or companies domiciled in the Nordic countries. The fund's strategy is to find low-priced, high-quality companies that are undervalued, under-researched and unpopular. The combination of a Nordic and a global mandate allows the fund to take part in the creation of wealth in sectors that are not available on the Nordic market. SKAGEN Vekst is an actively managed fund. Active management entails that the portfolio managers invest in companies on the basis of their own analyses. With common sense and long-term planning, the portfolio managers try to avoid purchases of shares in popular companies and industries at a price that is

too high relative to those companies' fundamental value and earnings. The profits in the companies develop over a period of time, as does the fund's return. SKAGEN Vekst does not invest in derivatives at present.

Benchmark index

The fund's benchmark index is a combination of equal weights of the MSCI Nordic Countries IMI Index and the MSCI All Country World Index ex Nordic Countries (daily traded total return net \$ in NOK).

Dividends

Dividends that the fund receives are automatically reinvested in the fund and are thus part of the unit value.

Investment period

SKAGEN Vekst is suitable for investors with at least a five year investment horizon. Subscription and redemption of units can be carried out on all Norwegian business days. The minimum subscription amount is EUR 50.

Risk and Reward Profile

This indicator measures the risk of price fluctuations. The risk assessment based on the fund's historical volatility calculated using weekly five year data, puts SKAGEN Vekst A in category 6. That means that the purchase of units is associated with a high risk of price fluctuations. The fund's position on the risk scale is not fixed and may vary over time.

There is risk associated with investment in the fund as a result of market fluctuations, changes in exchange rates, interest levels, general economic conditions, and specific sector and corporate circumstances. The distribution of investments in the equity fund is a result of SKAGEN's investment philosophy,

which involves seeking out unpopular, under-analysed and undervalued companies. This investment philosophy examines corporate valuations, product/market matrices, indebtedness and the liquidity of the financial instrument. In addition to the statutory requirements, SKAGEN has internal requirements for the spread of the investment between the various sectors and the liquidity of the financial instruments the fund invests in. SKAGEN has drawn up internal procedures for reducing the probability of operating errors which can affect the fund.

The fund's performance may vary considerably over the course of a year. Gains or losses for individual unit holders will therefore depend on the exact timing of the subscription and redemption of units. The fund invests in a wide range of securities in various regions and sectors. This results in fewer fluctuations in the fund's value than would be the case if it was invested in just one or a small number of individual securities. The fund spreads risk by means of this diversification.

Charges

One-off charges taken before or after you invest:	
Entry charge	0 %
Exit charge	0 %
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out respectively.	
Charges taken from the fund over a year:	
Ongoing charge	1.00 %
Charges taken from the fund under certain specific conditions:	
Performance fee	Better value development than 6% per annum, calculated daily, is divided 90/10 between the unit holder and SKAGEN. The unit class has a high-water mark. A charge of the performance fee may solely be made if the unit value as at December 31st exceeds the unit value at the previous charge/settlement of the performance fee. Performance fee for 2017 was 1.14 % of the AUM in the unit class.

There are no entry or exit charges connected with direct transactions with SKAGEN. Intermediaries such as distributors or advisors may however charge an entry and/or exit charge. Contact your advisor for more information.

Ongoing charges show the amount paid for management, administration, marketing and other costs, and reduce the return of the fund. The charges represent the actual figures for the previous calendar year and may vary from year to year. Ongoing charges are calculated daily and charged quarterly. Performance fee is calculated daily and charged/settled annually.

All the charges the management company may deduct from the fund are included in the ongoing charge, apart from:

- Performance fees
- Transaction-based costs
- Extraordinary costs

For more information about charges, please see section 2, § 5 and § 7 in the Fund's prospectus which is available at www.skagenfunds.ie

Past Performance

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the Fund's risk profile and management fees. The return may become negative as a result of negative price developments.

All return figures are in EUR after deducting costs (listed in the Charges section).

Effective 1/1/2014, the Fund's investment mandate changed from investing a minimum of 50% of its funds in Norway to investing a minimum of 50% of its funds in the Nordic countries. This means that returns prior to the change were achieved under different circumstances than they are today.

The Fund is denominated in NOK.

The Fund was launched on 1 December 1993.

The Fund's benchmark index prior to 1/1/2014 was an evenly composed benchmark index consisting of the Oslo Stock Exchange Benchmark Index (OSEBX) and the MSCI All Country World. The benchmark index prior to 1/1/2010 was the Oslo Stock Exchange Benchmark Index (OSEBX).
