Performance Commentary

There were reduced credit spreads for corporate bonds in general in April. High Yield bond spreads decreased by around 20 basis points and Investment Grade bond spreads by a few basis points. Risk free rates went in the opposite direction, with the US 10 year government bond up 20 bps and the German equivalent up 5 bps.

Notable positive contributors to the fund's return in April were Fiat, Petrobras and Bombardier. Fiat has continued to improve its credit metrics and this positive development has made the bonds more attractive in the bond market. Petrobras announced a buy-back of their 2020 bond, which pushed the bond price up to the buy-back level. Bombardier released good news regarding airplane orders and the CSeries deal with Airbus looks likely to close this summer.

On the negative side, Rolta had a poor month after the restructuring process ran into some difficulties. This is an ongoing process and both positive and negative news have a large impact on the bond price.
